

Maximizing Earth's Potential

Alfalfa Booster Liquid

Liquid Broadcast Treatment for Alfalfa

Get more from every cut, with Alfalfa Booster.

Terramax's Alfalfa Booster is an innovative, liquid treatment that combines two powerful bacteria, *Sinorhizobium* and *Azospirillum*. ***Sinorhizobium* encourages nodulation** with each application. *Azospirillum* boosts **nitrogen fixation** even further while **stimulating root growth**, helping plants **access nutrients and water more effectively**.

Alfalfa Booster needs to be broadcast applied after each cutting with 5-10 gallons of water or used in fertigation to help drive the bacteria into the soil.

The Result?

A healthier, more vigorous alfalfa crop with improved nutrient uptake, better resilience, and increased total yields with each cut.

Directions for Use

Broadcast spray at a rate of 12.8 fl. oz. of product per acre. Best when applied at spring emergence or immediately after cutting. Product must be applied with water. Use before expiration date.

Guaranteed Analysis

Sinorhizobium meliloti 1×10^6 per mL
Azospirillum brasilense 2×10^4 per mL

Alfalfa Booster Liquid

Liquid Broadcast Treatment for Alfalfa

Proven Results. Real ROI.

In just the first year's testing, growers saw **over 1,300 more pounds of alfalfa per acre** across four cuttings compared to untreated fields. TerraMax Alfalfa Booster doesn't just work, it also provides growers with a great ROI.

With decades of expertise in stabilizing live bacteria and delivering cost-effective ag solutions, TerraMax is proud to bring you a product that works as hard as you do.
