Maximizing Earth's Potential

TerraMax Inc., was founded in February 1998 to develop products that offer environmentally and economically sound solutions for agricultural markets. The main area in which The Company has focused its research has been the development of nutritional aids for plants. TerraMax's proprietary stabilization technology allows the company to formulate products that bring microorganisms from laboratory to the field.

TerraMax manufactures a variety of products for the agricultural, commercial and retail markets, all of our products are designed to maximize the potential of the system that our bacteria and materials are being used in. Our products are environmentally friendly, and may be used as supplements to traditional fertility programs, and in some cases can replace traditional inputs.

Corn

AZ Green-IF™

AZ Green Dry™

Maximizing Earth's Potential

TerraMax AZ Green-IF™

In Furrow Treatment for Corn

AZ Green-IF™ contains two strains of Azospirillum: Azospirillum lipoferum and brasilense. AZ Green-IF™ has a total Azospirillum of 2×10^4 per ml.

- TerraMax has been developing products for nearly 20 years.
- TerraMax takes high priority in continued research and development.
- TerraMax has been approved by many Organic certifiers.
- All claims are based on documented trials.
- Economical Solutions with greater yield.
- TerraMax offers distributor opportunities.

TerraMax AZ Green Dry™

Organic Seed Treatment for Corn

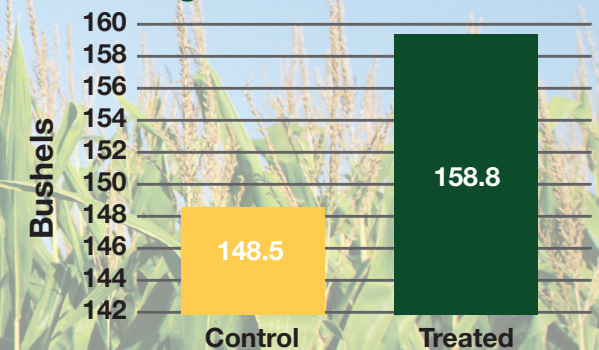

AZ-Green Dry™ fixes atmospheric nitrogen, adding to the nitrogen available to the plant. AZ-Green Dry™ potentiates nitrogen utilization in the plant. Azospirillum bacteria have been known to improve root systems and increase yields for some time.

However, in the past keeping bacteria viable under field conditions for on farm use was limiting factor. Using proprietary formulation technology AZ-Green Dry™ has been stabilized for at least one year at 95°F. This is key to AZ-GreenDry™ performance. Multi-year University trials and on-farm tests consistently produced 4–10 bushels/acre yield increases. *(Past performance is not a predictor of performance and AZ-Green Dry™ carries no guarantee of performance on your farm.)*

Benefits

- Improves Plant Growth
- Fixes Nitrogen
- Stimulates Rooting
- Increases Yields

Organic Corn Yield

Greater Yield...Greater Gain
